Profile

Curiosity-driven QA and technical support professional with hands-on experience in workflow validation, customer operations, gameplay testing, technical troubleshooting, and AI-assisted productivity systems. Skilled in identifying usability issues, analyzing system behavior, and delivering structured operational feedback to improve workflows and user experiences. Experienced in Amazon device support, ticketing system operations, internal tool testing, and collaborative workflow analysis with DevOps-oriented teams. Passionate about systems thinking, debugging, interactive technologies, game testing, and building modern technical workflows enhanced through AI-assisted research and problem-solving.

Experience

Technical Support Associate, Customer Operations

Amazon Development Centre India Pvt. Ltd.

2022 – 2024 Hyderabad, India

- Provided technical support for Amazon devices across multi-channel customer operations while maintaining high customer satisfaction standards.
- Managed and operated ticketing systems for technical associates to streamline issue resolution workflows and escalation handling.
- Diagnosed customer-facing technical issues and guided users through structured troubleshooting processes.
- Collaborated with cross-functional operational teams to improve workflow efficiency and communication systems.
- Authored internal support articles and workflow documentation to improve team accessibility and knowledge sharing.
- Participated in testing and validation of internal support/connectivity tools designed for workflow optimization.
- Delivered structured functionality insights and operational feedback to DevOps-oriented teams regarding tool behavior and usability.
- Assisted in identifying workflow inconsistencies and operational pain points through exploratory system observation.

Customer Service Associate

24/7.ai

2021 – 2022 Hyderabad, India

- Resolved customer concerns and escalations through structured communication and empathetic problem-solving.
- Delivered multi-channel support while maintaining strong customer experience and operational efficiency.
- Assisted users with issue clarification, resolution management, and service guidance.
- Collaborated with team members to improve support consistency and response quality.

Gameplay Testing Participation

Lionbridge Game Studios

Independent Testing Remote

- Participated in early-access gameplay testing and exploratory validation sessions.
- Observed gameplay systems, user interactions, and potential stability-related issues.
- Provided structured gameplay feedback and usability observations.
- Assisted in identifying gameplay inconsistencies and user experience concerns.

Exploratory Gameplay Testing

Metagravity — Edge of Chaos

Independent Testing Remote

- Participated in exploratory gameplay testing and system observation sessions.
- Provided gameplay behavior feedback and stability-related observations.
- Assisted in validating gameplay interaction quality and user experience flow.

External Playtest Participation

2XKO

Independent Testing Remote

- Participated in gameplay testing sessions focused on interaction flow and gameplay feedback.
- Observed gameplay systems and user experience behavior during testing phases.
- Contributed structured observations related to gameplay responsiveness and interaction quality.

Projects

NFS Unbound Crash Resolution Analysis

Technical Troubleshooting & Stability Validation

- Investigated crash-related behavior affecting gaming systems and application stability.
- Performed troubleshooting analysis to identify potential root causes and compatibility issues.
- Tested multiple fix approaches and validated successful stability improvements.
- Published troubleshooting documentation and findings through GitHub resources.
- Improved understanding of debugging methodologies, crash analysis, and technical issue isolation.

Skills

Service & Operations: Technical Support, Customer Service, Multi-Channel Support, Ticketing Systems, Escalation Handling, Workflow Coordination

QA & Technical Skills: Exploratory Testing, Workflow Validation, Bug Identification, Gameplay Observation, Crash Troubleshooting, Technical Documentation, Tool Testing, System Observation

AI & Workflow Systems: Prompt Engineering, AI-Assisted Research, Workflow Optimization, Technical Structuring, AI Productivity Systems, AI Content Assistance

Tools & Platforms: GitHub, Ticketing Systems, Workflow Documentation Systems, AI Productivity Tools

Education

Bachelor of Arts in Psychology, Public Administration & Political Science

Osmania University, Hyderabad

2020 – 2023 | Hyderabad, India

Civics, Commerce, Economics

Bhavan's Sri Aurobindo Junior College

2018 – 2020 | Hyderabad, India
